

# HD 338492 — Confirmation Checklist

| Check               | Result                                                                              | Detail                                  |
|---------------------|-------------------------------------------------------------------------------------|-----------------------------------------|
| C1: Gaia quality    |    | RUWE=2.05, $\sigma$ =249.1              |
| C2: Orbit solution  |    | P=44.41d, e=0.007, K <sub>1</sub> =80.4 |
| C3: Mass function   |    | f(M)=2.39 > 0.5                         |
| C4: Spectral type   |    | B9 → Teff=10500 K                       |
| C5: HR diagram      |    | M <sub>1</sub> =4.40 on MS              |
| C6: Extinction      |    | A <sub>V</sub> =2.85, resolved          |
| C7: SED fit         |    | $\chi^2$ =14.1 (dereddened)             |
| C8: Companion light |    | 419× exclusion                          |
| C9: X-ray           |    | Non-detection (dormant)                 |
| C10: UV excess      |    | No GALEX coverage                       |
| C11: Mass posterior |  | P(BH)=98.5%                             |
| C12: Alt. scenarios |  | 5/6 excluded                            |
| C13: Final verdict  |  | COMPELLING                              |

**Score: 11P / 20 / 0F — Verdict: COMPELLING BH CANDIDATE**
